Phoenix North | February 2010

As of January 2010 active inventory was 2,197, a 26% decrease from January 2009. There were 305 closings in January 2010, a significant increase of 34% from January 2009. Months of Inventory was 7.2, down from 13.1 in January 2009. Median price of sold homes was \$196,000 for the month of January 2010, down 18% from January 2009. North Phoenix is experiencing an increase in buyer activity, with new properties under contract up 85% from January 2009. If you are looking to buy a home, you now have until April 30, 2010 to qualify for the Home Buyer Tax Credit! Up to \$8,000 for first time homebuyers and now up to \$6,500 for current homeowners purchasing a primary residence.

Months of Inventory, Active Listings and Closings

These statistics are based on information obtained from the ARMLS on 2/4/10 using Brokermetrics software. Information is believed to be reliable, but not guaranteed. Months of Inventory (MOI) reflect the time period required to sell all the properties on the market given the number of closed transactions in the preceding month, provided no new product becomes available. This is an excellent benchmark to show the velocity of transactions in relation to the market inventories. This measurement is a broad one and will vary (in some cases dramatically) by price range, location and type of property.

Median and Average Price (Closed Sales)

These statistics are based on information obtained from the ARMLS on 2/4/10 using Brokermetrics software. Information is believed to be reliable, but not guaranteed.

\$750,000 - 999,999	89	6	6	1	5	6	1	89.0
\$1,000,000 - and over	133	1	1	0	2	6	3	44.3

These statistics are based on information obtained from the ARMLS on 2/4/10 using Brokermetrics software. Information is believed to be reliable, but not guaranteed. Months of Inventory (MOI) reflect the time period required to sell all the properties on the market given the number of closed transactions in the preceding month, provided no new product becomes available. This is an excellent benchmark to show the velocity of transactions in relation to the market inventories. This measurement is a broad one and will vary (in some cases dramatically) by price range, location and type of property.

Real estate is in fact very localized. Market conditions can vary greatly by not only geographic area but also by price range, as demonstrated in the above Long Realty Research Center chart. Find the price range of interest to you to track relevant market conditions, and contact me for a more in-depth analysis.
